

BCS FOR PRODUCT SAFETY

Throughout the world, sales of chemical products are subject to stringent safety standards. Regulations on product safety and dangerous goods also vary from region to region.

BCS for Product Safety ensure greater flexibility in handling routine product safety tasks, guarantee compliance and fully utilize economies of scale..

BCS for Product Safety

National and international legislation poses numerous challenges for companies that develop, manufacture, and market chemical products. As an in-house service provider, the product safety department is responsible for the smooth and efficient implementation of regulations.

The demands faced by this department continue to grow, as

- Companies enter new markets and regions,
- Product portfolios are revised and expanded at an ever faster pace,
- Governments and commercial bodies amend laws and introduce new ones,
- In-house service providers face cost pressures,
- Customers place ever greater demands on the quality of communication and documentation.

These factors steadily increase both the amount of product safety documentation required and demands on the availability and quality of information.

Our Business Compliance Services for Product Safety help you acquire and maintain the required data efficiently and in full compliance with regulations.

PRODUCT SAFETY SERVICES:

- Creating Safety Data Sheets
- Supplying Label Information
- Supplying Dangerous Goods Data and Classification
- Product Registration
- Compliance Consulting Services

CREATING SAFETY DATA SHEETS

No matter where you export your products, we will provide you with the relevant data sheets. In doing so, we take into account e.g. EU Directive 91/155 EEC, Annex I of the Hazardous Substances Directive, ANSI Standards, GHS, country-specific regulations such as the German Technical Regulations on Dangerous Materials (TRGS), the Hazardous Substances Ordinance (GefStoffV), MalCode, OSHA, RTK, ACGIH, WHMIS and the various OELs.

SUPPLYING LABEL INFORMATION

We tell you what needs to be on the label. We also collect the information relevant for the label based on factors such as your product, its packaging and the countries where you wish to market it, thus ensuring that your product labeling complies with regulations.

Some regulations:

- Hazardous Substance Directive (67/548/EWG), Hazardous Preparations Directive (1999/45/EWG)
- U.S. Consumer Label (CPSC), Canadian Consumer Label nach CCCR
- National Code of Practice for the Labelling of Workplace Substances [NOHSC:2012(1994)], General Rules for Preparation of Precautionary Label for Industrial Chemicals GB15258-1999, Toxic Chemical Control Act and Industrial Safety and Health Act (Korea), Poisonous and Deleterious Substances Control Law (Japan)

SUPPLYING DANGEROUS GOODS DATA AND CLASSIFICATION

We classify your dangerous goods in compliance with ADR, RID, ADNR, IMDG, IATA, CFR, TDG, ADG, China List of Dangerous Goods and Taiwan Rules on Road Traffic Safety. Based on the classification, we then draw up the necessary accompanying documentation in the appropriate languages.

PRODUCT REGISTRATION

We help you to register products and process customer queries relating to product ingredients.

COMPLIANCE CONSULTING SERVICES

Full compliance entails both knowing all the relevant laws and implementing regulations so that they intermesh with operating processes.

We analyze your processes, put together your compliance profile and help you to implement new regulations such as REACH and GHS. Our compliance consulting services are available for all tasks relating to product safety.

OUR SERVICE MODEL

Our fast, efficient and high-quality services are founded on IT solutions and expertise from TechniData.

SERVICE PORTAL

The BCS Service Portal offers you a platform that helps you transfer product safety information to us, monitor the status of processes, and exchange information with us efficiently – all at the click of your own mouse.

The Service Portal comprises:

- Service tracking
- On-demand safety data sheets
- Help desk
- Data exchange

BUSINESS PROCESS INTEGRATION INTO SAP SOLUTIONS

Because we merge specialist services with information technology, companies operating SAP solutions such as mySAP ERP can seamlessly integrate our services into their system. We archive product safety information in structured EH&S-compliant form in your SAP solution, enabling you to directly process the data in downstream business processes such as development, production, sales and shipping.

BUSINESS PROCESS INTEGRATION INTO OTHER ERP SYSTEMS

If you use a different ERP system, we can supply your results in various formats:

- XML

Data and documentation are supplied in XML format, so that you can easily integrate them into your IT systems.

- PDF

We supply all the documentation you require in PDF format either by e-mail or on CD.

- Application Services Providing (ASP)

If you do not have your own EH&S solution, we provide access to a high-performance IT application that will efficiently manage information, enabling you to feed it into your business processes.

The advantages of Business Compliance Services at a glance:

- Compliance

Your documentation will always be up to date and compliant with statutory regulations. Because we take responsibility for ensuring compliance with regulations, you reduce the risks to your own company.

- Cost-effectiveness

We employ standardized back-office solutions and keep your infrastructure up to date with information on new laws, phrases and legislation. Our services offer exceptional cost-effectiveness thanks to the resulting synergies. You benefit from reduced costs.

- Flexibility

Product safety departments often have to cope with very high workloads resulting from amendments to regulations, new products, company acquisitions, and expansion into new markets. We help ensure full compliance and long-term adherence to regulations and directives.

- Scalability

Whether you need help in drawing up safety data sheets for the North American market or want to optimize your entire product safety process, we are happy to tailor our services to your precise needs.

Our expertise in product safety ensures efficiency and full regulatory compliance. Our technology means that you can react quickly.
