

Customer Success Stories

“We had to take action and reorganize our dangerous goods management to avoid becoming bogged down. In terms of cost-effectiveness, there was only one solution, TechniData CSM (Chemicals Safety Management), that could be incorporated seamlessly into our SAP ERP system and maximize process automation.”

Jörn Fries, Environment Department, John Deere

JOHN DEERE

“We decided to work with TechniData in order to create a solid basis for all processes that involve hazardous substances. We also wanted to make sure we are properly prepared for changes made to chemicals regulations in the future. Thanks to TechniData BCS and EH&S, we don't have to worry about new regulations.”

Ottmar Sul, Volkswagen AG

“With SAP Environmental Compliance in place, we're able to respond more quickly than ever before to problem situations and generate a clear audit trail that more than meets the requirements of the regulatory authorities. This reduces Tesoro's risk, builds valuable trust with the regulating agencies, and reduces the cost of compliance through improved efficiencies.”

OUR CUSTOMERS

Our impressive customer list speaks volumes. More than 1,600 customers worldwide rely on TechniData solutions. They recognized the competitive edge gained through integrated compliance management solutions.

About us

TECHNIDATA

TechniData is the leading provider of solutions and services in the areas of product, chemical, environmental, and health & safety compliance. Compliance means operating in accordance with regulatory requirements, industry standards and voluntary undertakings. As a specialist company we develop, implement, and operate innovative software solutions. Furthermore, we offer services that enable companies to shape and optimize the sustainability of their business processes in a legally compliant manner.

TechniData has been developing compliance solutions for over 20 years and is a strategic development partner for SAP. More than 1,600 customers worldwide rely on TechniData solutions.

Why choose TechniData?

We know our customers' businesses inside out. Our development experts have a keen eye for trends and innovations relating to compliance and sustainability. For over 20 years, they have been exploring new avenues to ensure our customers' operations are legally compliant, environmentally sound and efficient.

TechniData customers benefit from integration and the ability to transparently map their workflows. With this future-focused approach our customers continuously impress their customers, partners and stakeholders.

Customer Success Stories

"We have reduced ongoing costs in Japan alone by over 50%. While our prior landscape was cumbersome and costly, the solution TechniData CfP (Compliance for Products) has streamlined our compliance processes and lowered operational costs. Given the openness and completeness of the solution, we're confident that it can support future compliance regulations."

Gary Matula, Vice President Information Systems, Molex

"With centralized hazardous substance management we guarantee compliance in handling such substances. TechniData HSS (Health and Safety Surveillance) helped us to increase the quality of our data and, at the same time, reduce the efforts required for creating standard operating procedures."

Herbert Kurz, Head of Central Environmental Management (ZUM), Hella
