

# SAP EH&S Success Story

mySAP™ PLM Environment, Health and Safety (EH&S)

**BY USING EH&S INDUSTRIAL  
HYGIENE AND SAFETY  
PETROTRIN CAN STRIVE FOR AN  
ENVIRONMENT OF 'ZERO  
TOLLERANCE' FOR EMPLOYEE  
SAFETY PRACTICES**

**“SAP EH&S Industrial Hygiene and Safety supports PETROTRIN's 'zero tolerance' policy for safety. Implementation of the module allows tracking of near miss data, risk assessment, capture and analysis of employee and contractor safety records and analysis of chemical exposure of employees at the facilities. The Industrial Hygiene process in SAP EH&S has taken our 'paper' based system and automated it for the benefit of all. Additionally, we have streamlined processes and created an environment where close to real time data is available to all.”**

Kevin Singh, HSE Business Analyst  
PETROTRIN, Republic of Trinidad and Tobago

Petroleum Company of Trinidad and Tobago Limited, PETROTRIN, integrated oil company incorporated January 1993, is fully owned by the Government of the Republic of Trinidad and Tobago. Our recently upgraded refinery, throughput in excess of 165,000 bpd, accommodates third party crude processing at very advantageous fees. PETROTRIN's customers are served by a cadre of highly trained, highly motivated staff in a mature Trinidad and Tobago petroleum industry tradition dating back to 1857 when the world's second commercial oil well on record was drilled in Aripero in the south of the island of Trinidad.
